

**Aliens visit
Earth for the
first time**

**People start to
leave Earth for
other planets**

**Robots take
every single
human job**

**We make new
and exciting
animals**

**We take pills
instead of
eating food**

**We stop using
money
altogether**

Humans
become faster
and smarter

Companies pay
you to play
games

We find the
cure to cancer
and HIV/AIDS

We can learn
anything by
downloading it

We learn how to
stop death and
live forever

We can
marry robots
and have kids

We stop using
smartphones
and tablets

We start living
on and under
the sea

A disease kills
everyone on
Earth

World War
Three
begins

Governments
force you to
have children

Pollution finally
destroys the
Earth
