

I say we ...

Let's not forget, ....

What a way to ...

I wouldn't mind  
seeing it become ...

\_\_\_\_\_ a park or recreational area.

\_\_\_\_\_ that this old building is heritage listed.

\_\_\_\_\_ sell out to corporate donors and big business.

\_\_\_\_\_ redevelop the area and try to encourage some investment.

Old buildings on **prime real estate** should be knocked down.

We shouldn't waste time **restoring** old dilapidated buildings.

Why **renovate** an old building when you can start from scratch?

What is cultural **heritage**? It's such an abstract idea.

**National treasures** can only be found in zoos and museums.

The cost of **preserving** historical buildings is ridiculously expensive.

**Prime real estate**  
should be reserved for  
offices and businesses.

Governments shouldn't  
be responsible for  
**restoration** work.

**Renovation** is common  
practice and good for  
the economy.

Once we lose our  
cultural **heritage**, it is  
lost forever.

**National treasures**  
have sentimental, not  
practical value.

It's our duty to  
**preserve** and protect  
old buildings.

**Prime real estate** is controlled by the rich and wealthy.

**Restoration** is preferable to **renovation**.

**Renovated** places should benefit and be accessible to the public.

**Heritage**-listed buildings attract tourists & make the city better.

**National treasures** should be managed by private companies.

**Preservation** means we must deny public access to old sites.

Old buildings on **prime real estate** should be sold for profit.

**Restoration** of old buildings enhances the city for all.

**Renovation** should only be done on the interior.

Architectural **heritage**, will stand the test of time.

**National treasures** are priceless and should never be sold.

To **preserve** our past, old buildings must be legally protected.
